PREPARED EXCLUSIVELY FOR ONE INSTITUTION

Competitive Fee Position

Prepared for

Sample Community Bank

SAN FRANCISCO FED DISTRICT · BANK · COMMUNITY BANK, $300M–$1B

Compared with 60 banks with $300M–$1B in assets nationwide that publish fee schedules in the Bank Fee Index. Each fee is compared only with the peers that publish it; lines with fewer than eight such peers are shown but not ranked.

60

PEER COHORT	BENCHMARKED AGAINST	SOURCE
Community banks, $300M–$1B · nationwide	60 peer institutions with published fee schedules	feeinsight.com

IN BRIEF

Summary of findings

01

$18 vs $5

deposited-item return fee, yours vs peer median

Your deposited-item return fee is well above the market range.

At $18, it is 3.6× the $5 peer median and the highest of the 15 peers that publish it (middle half of the market: $5–$10). This fee falls on the depositor for a check someone else wrote, which makes it a frequent example in fee-fairness criticism.

02

$8 vs $5

cashier's check fee, yours vs peer median

Your cashier's check fee is above the market range.

At $8, it is $3 above the $5 peer median and the 82nd percentile of 11 peers (middle half of the market: $5–$7). It is infrequent and mostly a perception item.

03

5 of 8

comparable lines inside the market range

Most of your schedule is priced with the market.

Of the 8 fee lines where we found both your published amount and at least eight comparable peers, five sit between the peer 25th and 75th percentiles, two above and one below.

Sample Community Bank is compared with 60 banks of similar size nationwide that publish fee schedules in the Bank Fee Index; a national set is used because fewer than 15 same-size peers in California have published data, so local competitors may price differently. Of 8 rankable lines, five sit inside the middle half of the market, two above it (deposited-item return fee and cashier's check fee), and one below it (outgoing international wire fee). We would suggest two steps, in order of value: (1) review the deposited-item return fee, which sits well above the market range; the peer median of $5 is the reference point; (2) check that the overdraft fee is published where customers can find it.

THE POSITION MAP

Your published fees against the peer range

Compared with 60 banks with $300M–$1B in assets nationwide that publish fee schedules in the Bank Fee Index. Each fee is compared only with the peers that publish it; lines with fewer than eight such peers are shown but not ranked. Percentile = share of peers charging the same or less; the tick marks the median. The line beneath each category is the published fee we used.

LINE BY LINE

Lines that warrant attention

Deposited-item return fee — $18

Peer median $5 · middle half $5-$10 · range $3-$12 · 100th percentile · n=15

Published as “Returned deposited item.” At $18 it is 3.6× the $5 peer median. This fee falls on the depositor for a check someone else wrote, which makes it a frequent example in fee-fairness criticism. A penalty fee offers little service to differentiate on, so the peer median of $5 is the natural reference point.

Cashier's check fee — $8

Peer median $5 · middle half $5-$7 · range $3-$20 · 82nd percentile · n=11

Published as “Cashier's Checks (Customers).” At $8 it is $3 above the $5 peer median. It is infrequent and mostly a perception item. Holding the premium is reasonable if the service behind it is differentiated; otherwise the peer median of $5 is the reference point.

Outgoing international wire fee — $40

Peer median $50 · middle half $46.25-$61.25 · 25th percentile · n=8

Published as “Wire Transfer - International Outgoing.” A customer-favorable price on a low-volume line. No action is indicated unless it is an old price that was never revisited, in which case the peer median of $50 is the reference point.

Fees we could not find in your published schedule

Overdraft fee: published by 17 peers (median $30)

Absence here means the line was not in the documents listed in § 06, not that you do not charge it. Regulators and comparison sites increasingly expect the full consumer fee schedule to be posted in one place.

POSTED PRICE VS. REALIZED INCOME

Fee income in context

Public regulatory filings (FDIC Call Reports) set alongside your published pricing. Income comparisons use same-charter, same-size institutions.

TOTAL ASSETS	TOTAL DEPOSITS	EMPLOYEES
$405.1M	$357.1M	58 2 branches

SERVICE-CHARGE INCOME	FEE-INCOME INTENSITY	RETURN ON ASSETS
$96,000 0.5% of revenue	2.2 bps cohort median **1.7 bps** of assets	1.01% cohort median **1.16%**

Fee economics vs. your cohort

METRIC	YOU	P25	MEDIAN	P75	POSITION	ASSESSMENT
Service-charge income	**$96,000**	–	$93,000	–	—	In line
Fee intensity (income / assets)	**2.2 bps**	0.9 bps	1.7 bps	2.7 bps	P64	In line
Fee dependency (share of noninterest income)	**6.1%**	1.9%	3.6%	6.1%	P75	Higher share
Fee income vs. net income	**2.2%**	–	1.4%	–	—	Higher share

Across the 8 lines we could rank, your posted prices average the 66th percentile of peers; service-charge income relative to assets sits at the 64th percentile of the same-size cohort. Both sit above the middle of the market, so fee income is a meaningful contributor and any repricing should be modeled against actual incidence first.

Fee-intensity trend (year-end filings): 2024: 2.8 bps → 2025: 2.2 bps · cohort median 1.7 bps.

Deposit footprint (FDIC Summary of Deposits, 2025): 2 branch locations across 1 county holding $367.0M in deposits.

Financial figures as filed (Mar 31, 2026 snapshot; revenue from Dec 31, 2025 full-year filing). Cohort medians computed across 1,427 same-charter, same-tier institutions' latest full-year filings.

PEER BY PEER

How named peers price the same lines

Peers from your comparison set, nearest first (same state, then the most lines in common). All figures from each institution's published fee schedule; a dash means the peer does not publish that line.

INSTITUTION	NSF / RETURNED ITEM	MONTHLY MAINTENANCE	DEPOSITED ITEM RETURN	STOP PAYMENT	OUTGOING DOMESTIC WIRE
Sample Community Bank (you)	**$33.00**	**$10.00**	**$18.00**	**$30.00**	**$25.00**
Redwood Capital Bank (Eureka, CA)	$35.00	$5.00	–	$25.00	$15.00

American Community Bank of Indiana (Saint John, IN)	$35.00	–	–	$35.00	$30.00

CONTEXT AND METHOD

Market context

Overdraft and returned-item fees have been the focus of regulatory and public attention since 2022, and many of the largest banks have reduced overdraft fees or eliminated NSF fees outright. Community institutions have moved more slowly and more unevenly, which is why the spread inside a peer set is often wider than the headline national averages suggest.

Fee schedules are also now public in a practical sense: they are collected, compared and summarized automatically. A customer or examiner comparing Sample Community Bank with its peers sees the same published lines this report uses, so the schedule is a positioning document as much as a pricing one.

How to use this report: § 02 shows every line against the peer range; § 03 explains the lines that sit outside it; § 05 names peers line by line. Ranked comparisons require at least eight peers publishing the same line. Where your institution offers several amounts for one category, the report uses the standard consumer charge described in the methodology below.

Methodology & data provenance

Fee data is drawn from institutions' published fee schedules, collected and verified by the Bank Fee Index pipeline and checked against each category's definition and a plausible price range. Peer cohort: 60 banks with $300M–$1B in assets nationwide. For each category the report uses one standard consumer charge per institution: the generic line rather than a channel-specific variant (online, branch, business), the per-item amount for penalty fees, and the lowest positive amount for monthly maintenance (entry checking); a $0 option is noted where one exists. A line is marked *above range* when it exceeds the peer 75th percentile, *2× median* when it is at least twice the peer median, and *below range* under the 25th percentile. Percentiles require at least eight peers publishing the same line. Data pulled Oct 3, 2026. Published amounts may not reflect account-specific waivers or negotiated pricing.

Your source documents

Every figure attributed to Sample Community Bank in this report was extracted from your own published documents:

`1 published fee schedule document on the institution's website` (URL withheld in this sample)

THE FULL LEDGER

Your complete published fee schedule

Every distinct fee line the Bank Fee Index has extracted and verified from Sample Community Bank's published documents (38 lines, as of Oct 3, 2026). Category comparisons in § 02 use one standard line per category from this list.

PUBLISHED FEE LINE	AMOUNT	FREQUENCY / TERMS
ACH Origination	**$20.00**	monthly · per statement cycle
ATM withdrawal (exceeding four per month at non-network ATMs)	**$1.00**	per occurrence
Balancing and research	**$25.00**	other · per hour
